What’s Our Vision?

Our Town’s public safety building -- which currently includes police, fire, and paramedics services -- was originally constructed in 1927. While it has served our community well over those 93 years, today it is physically and functionally obsolete, with extensive structural deficiencies, and is not compliant with Essential Service Act (ESA) requirements for public safety buildings. A construction management company found it would be cost prohibitive to correct the numerous deficiencies and non-compliance issues.

In determining how to best modernize the Town’s facilities with a new public safety building, some choices need to be made, and we are seeking input from our residents on a vision for future service delivery.

What are the choices?

We are considering two options to address our fire engine and paramedic ambulance facilities, assuming the community wants to keep police and administrative facilities in Town:

- For about $28.4 million, we can rebuild the fire station, along with police, paramedic quarters, and administrative space; or
- For about $14.6 million, we can relocate our fire staff to a neighboring station, and rebuild police, paramedic quarters, and administrative space

We want to hear from you.

Join the community conversation on this important discussion Thursday, October 29th, 6:00-8:00 p.m. via Zoom. For more information, please visit the project page at https://www.townofross.org/civiccenter or contact Patrick Streeter, pstreeter@townofross.org, 415-453-1453 ext. 121.
